▶▶ THE MICROPHONE COMPANY

40 Years U 87

The design of the microphone is a registered design of the Georg Neumann GmbH in certain countries.

The Neumann U 87 is probably the world's best-known studio microphone. On the occasion of the 40th Anniversary of this living legend the exclusive U 87 Anniversary Set is available from Neumann.

This special edition, in a fine and robust, classic style case, is offered with unique product features.

The set includes an exclusively designed pop screen. Its characteristic design is a reminiscence of the sixties, the early years of the U 87.

The entire set shows the stylish combination of polished nickel parts with the traditional Neumann matte nickel look. Microphone, elastic suspension and pop screen are instantly recognizable.

The set contains a dust cover embroidered with the anniversary logo, and a pair of white gloves for handling this valuable equipment.

A signed and framed certificate of authenticity with individual serial number completes each original set.

▶▶ Technical Features:

- Switchable low frequency roll-off
- Switchable 10 dB pre-attenuation
- Three directional characteristics: omni, cardioid, figure-8
- Pressure-gradient transducer with double diaphragm capsule

www.neumann.com

Sensitivity at 1 kHz into 1 kohm	28 mV/Pa*
